

Artistar Jewels 2018 collects the stories of 170 international artists through their 450 creations, offering an encyclopedic selection on contemporary jewelry.

Jewels of the highest level, both for techniques and manufacturing, some characterized by high stylistic research and some by manufacturing excellence and reinterpretation of the traditional materials. Not only items to observe, to admire and to wear. They are first and foremost objects to tell, to live and to love.

Those who choose these body ornaments love them and are spokespersons of an idea or of a precise aesthetic concept and by wearing them the the wearer becomes a tableau vivant of a story.

In the volume there are also the special contents dedicated to the international artists Yoko Ono, Pol Bury and Faust Cardinali.

Get lost among the pages of this book; pages made of colors, materials, stories and passions, in a selection careful to news, without being afraid of the new. Walk a high creative and moving path. It's the love for the art. And jewelry as well, in the art field, represents the Zeitgeist, the history spirit and it is never an accessory element.
